## **Namespace Documentation**

### 3.1 trdrop Namespace Reference

### **Functions**

• void print\_hello\_from\_lib ()

Example description for the method print\_hello\_from\_lib which prints a string to std::cout.

### 3.1.1 Detailed Description

Example description of the trdrop.h

#### 3.1.2 Function Documentation

```
3.1.2.1 print_hello_from_lib()
```

```
void trdrop::print_hello_from_lib ( )
```

Example description for the method print\_hello\_from\_lib which prints a string to std::cout.

Details to this function with markdown test

## **File Documentation**

### 4.1 include/trdrop.h File Reference

```
#include <iostream>
```

### **Namespaces**

• trdrop

#### **Functions**

• void trdrop::print\_hello\_from\_lib ()

Example description for the method print\_hello\_from\_lib which prints a string to std::cout.

### 4.1.1 Detailed Description

A brief description of this header.

A detailed description of this header.

### 4.2 src/trdrop.cpp File Reference

```
#include "trdrop.h"
#include <iostream>
```

### **Namespaces**

• trdrop

#### **Functions**

• void trdrop::print\_hello\_from\_lib ()

Example description for the method print\_hello\_from\_lib which prints a string to std::cout.
